

## AMINO ENERGY COCKTAIL MIX

- **M.I.C.** contains: **Methionine, Inositol** and **Choline**
  - **Methionine** is one of the sulfur-containing amino acids. It acts as a lipotropic agent to prevent excess fat buildup in the liver and the body. *Patients with a sulfa allergy should make sure to tell their physician to omit this ingredient.*
  - **Inositol**, a nutrient belonging to the B vitamin complex, is closely associated with choline. It aids in the metabolism of fats and helps reduce blood cholesterol. It also participates in action of serotonin.
  - **Choline** supports the health of the liver in its processing and excretion of chemical waste products within the body. It is required for the transport and metabolism of fats and cholesterol within the body, which is important for the healthy support of the endocrine, cardiovascular and hepatic system.
- **Riboflavin** (Vitamin B2) an easily absorbed micronutrient. It plays a key role in energy metabolism, the metabolism of fats, carbohydrates, ketone bodies (a vital source of energy during fasting) and proteins.
- **Thiamine** (Vitamin B1) helps the body cells convert carbohydrates into energy. It is also essential for the functioning of the heart, muscles and nervous system.
- **Pyridoxine** (Vitamin B6) is needed for more than 100 enzymes involved in protein metabolism. It is also essential for red blood cell metabolism.
- **Niacin** (Vitamin B3) assists in the functioning of the digestive system, skin and nerves. It is also important for the conversion of food to energy.
- **L-Carnitine** a naturally occurring amino acid which plays a vital role in the metabolism of fat. It functions as a transporter of fatty acids into the mitochondria, the metabolic furnace of the cell.
- **Methylcobalamin B12** an energy booster and it is among the most important of all B-Complex vitamins. Helps with the metabolism of fats and carbohydrates. It also helps the growth of healthy blood cells, nerve cells, and proteins in the body.
- **Vitamin C** improves overall health, protects against immune system deficiencies and even skin wrinkling
- **Chromium Piconate** aids in weight loss, reduces fat and increases muscle mass
- **L-Glutamine** is a powerful amino acid that contributes to an anabolic state in muscles, improves immune function and enhances recovery as well as nourishes the brain, increases metabolism, and improves athletic performance.

### AMINO ENERGY COCKTAIL MIX INJECTION

**AMINO ENERGY COCKTAIL MIX is a great plus for those who are looking to lose those extra pounds and have a boost in their energy. This injection gives you all the minerals and vitamins that your body may be lacking because of intense dieting and/or exercising.**

**DIRECTIONS:** Inject up to 1 milliliter intramuscularly every day as directed by your physician.

*A valid prescription is required.*
